

ORGAN PULSE

- Superficial and deep levels for the 12 "organs"
- Timely information = present functional status of the organ
- Strong spike indicates good vitality of organ and weak indicates organ is taxed or working under duress; both indicate imbalance of functioning according to the doṣa disturbing the organ
- Localized spike indicates imbalance attributed to the doṣa that matches the quality of the spike
- Balanced Condition: strong, non-local spike under finger tip for each organ
